

Jaguar Touch Roadmap

Phase 1

We will do our best to have a successful mint and create a community that 100% Trust us , this requires high level of transparency and working closely with the community behind the project

Our founders and team members will try to interact with every individual people and answer to any question that they have about this collection , we will try to build the best relationship between team and community

We will launch our platform (read the Vision page on website to learn more) and help real talented artists , devs to use their work and talent to build web3

We will Fund the good upcoming Web3 Projects and make our platform the platform that people use to Build on Web3 and find good Web3 projects to invest in

Also We will use our funds to Advertise the NFT collection on every social media and create a real demand and good liquidity behind our NFTs

Overall in Phase 1 we try our best to have a good floor price and fully launch our platform

Phase 2

We will continue building our platform

At this stage our platform has gained enough support so we can get outside investors and partnerships to boost our platform and increase our DAO balance

This will support the projects and artists and improve our platform

Using our artists and our platform artists we will create our 2nd Collection which is All legendary NFTs

This collection will deliver the highest Quality in 3D art , each NFT made in this collection took our artists +7 days of work

People Who hold 2 NFTs from our first collection will receive guaranteed Whitelist spot And People Who hold 7 NFTs from our first collection will receive Free Mint To this collection

Also just like our first collection +50% of the mint funds will be used to grow our platform

Phase 3

Our Token \$JAGUAR will be released to everyone

We will Airdrop this tokens to our NFT holders based on how many NFTs they hold

We will create staking rewards for our NFTs so people hold NTFs can receive \$JAGUAR as reward for holding the NFTs

\$JAGUAR token is a governance token

The main Goal of \$JAGUAR is to make our project and our platform 100% decentralized and people with \$JAGUAR can vote and create proposals on how we should spend our platform money and what comes next

Full info on \$JAGUAR will be released later , we are still working on the token and utility behind it

Phase 4

We will launch our third and last collection

People who hold +2 NFTs from our collections can claim 1 NFT for Free

Our third collection will partner with luxury clothing brands

We will release clothes used in our third collection as merch for anyone interested to buy

Holders of our NFTs will receive (up to) 70% discount when buying merch

At this stage we hope we achieve the 100% decentralization on our platform and community can shape the future of Our collections and platform using \$JAGUAR token and our voting system

Phase 5

In our last Phase we will give the full control of the project Using our decentralization method

We will add Jaguar touch collection and other collections to the most successful metaverse built by then

We won't build our own metaverse but we will work closely with other projects on it

The team of the project will do 5 different events and have meetings with our holders in 5 different cities around the world and meet with holders
